

AADHIPRADHAP V.

B.Sc Computer Science (Artificial Intelligence & Data Science)

Email: aadhivel2914@gmail.com | Portfolio: <https://aadhipradhap.dev> | Tamil Nadu, India

PROFESSIONAL SUMMARY

Passionate and detail-oriented B.Sc Computer Science (AI & Data Science) student driven by the vision of "Turning Ideas Into Intelligent Digital Experiences." Proficient in Python, machine learning workflows, modern web development, and computer vision forensics. Skilled in developing innovative solutions like AI-driven Fake Certificate Detection, predictive analytics pipelines, and interactive digital interfaces.

TECHNICAL SKILLS

- Programming Languages: Python, C, C++, JavaScript
- AI & Data Science: Machine Learning, Deep Learning basics, Computer Vision, Data Analysis, Scikit-Learn
- Web Technologies: HTML5, CSS3, Modern JavaScript, React, Tailwind CSS
- Tools & Platforms: Git, GitHub, MS Office Suite (Word, Excel, PowerPoint), VS Code, Jupyter Notebook

FEATURED PROJECTS

AI Fake Certificate Detection System

Technologies: Python, Computer Vision, OpenCV, Machine Learning, Streamlit/Flask

- Engineered an automated forensic analysis model to identify forged, manipulated, or counterfeit educational and professional credentials.
- Implemented optical character anomaly detection, digital signature validation, pixel-level manipulation heatmaps, and tamper detection.
- Reduced manual verification turnaround time by over 80% while enhancing counterfeit recognition accuracy.

Predictive Data Intelligence & Visualizer Dashboard

Technologies: Python, Pandas, Scikit-Learn, React, Tailwind CSS

- Built an interactive analytics tool evaluating high-dimensional dataset features with statistical distribution modeling.
- Integrated real-time forecasting algorithms and responsive data visualization graphs for immediate decision support.

INTERNSHIP EXPERIENCE

AI & Data Science Intern

Duration: 2024 - Present | Focus: Machine Learning & Intelligent Systems

- Assisted in building and validating machine learning models on domain datasets with rigorous cross-validation.
- Performed data preprocessing, outlier removal, and exploratory data analysis (EDA) using Python libraries.
- Collaborated on designing user-facing dashboard interfaces to visualize predictive model inference results.

EDUCATION

Bachelor of Science in Computer Science (AI & Data Science)

Undergraduate Degree | Focus: Artificial Intelligence, Data Science, Algorithms & Software Engineering

Higher Secondary School Certificate (HSC)

Computer Science Stream | Physics, Chemistry, Mathematics & Computer Science
